Faymonville has built a solid reputation in the manufacturing of customized and mission-critical semi-trailers for a wide range of special transport.

DUALMAX

Widening under load - fast, safe and easy

DUALMAX MODULAR PLATFORM TRAILER

Modular heavy haul platform trailer that is able to be widened under load (lift & shift system).

- Axles are able to be widened under load from 14' to 20' in a fast, easy and safe way
- Steering system remains untouched - no disconnecting of any part
- Very strong and torsion resistant chassis with high point load capacities on central beam and outer frames
- Light weight: about 10,000 lbs/line of tare weight)
- Foldable frame: less than 10' for easy transport on conventional trailer
- Load per axle line: 52,900 lbs at 50 mph
- Extremely high points loads of 40,000 lbs. can be applied over each axle bearing
- Platforms are fully metalized (zinc-plated) ensuring the best corrosion protection available on the market
- Can be operated with gooseneck and/or draw bars
- Can be operated with accessories from third parties (suspension beams, drop deck, etc.)
- Pendulum axles with a turning angle of $-55^\circ / +55^\circ$

Goes Anywhere, Hauls Anything!

AREAS OF USE

DualMAX modular trailers are suitable for the transport of:

- Industrial parts (transformers, crane-loaded goods, containers)
- Crane systems (cranes, crane weights, crane components)
- Pipeline elements
- Offshore structures (drilling platforms, wind turbines, platforms, pipelines)
- Ships or parts of ships
- Power stations and bridge elements
- Bulky goods, long materials and heavy loads
